RE: Northwestern Steel & Wire Company

Dear Steve:

I want to congratulate you on a job well done on our recently completed project for H & M Construction, the Northwestern Steel & Wire Plant in Hickman, Kentucky.

As you know our primary concern on this 196,000 SF steel building was the very tight schedule we faced. You met this schedule, even though at times we had to have you work somewhat out of order to allow other trade access to do their work. Cooperation is so important on a project like this, and you certainly did your part.

You completed the erection of this 40+' tall building safely - I don't believe there were any lost time injuries, and there was not much of a punch list at the end of the project.

Steve, I found you to be quite fair and enjoyable to work with, as were Mike and Donnie on the site. If we asked them for something they were cooperative in responding. That is what it takes to make a successful project, and I certainly believe we had a successful outcome. We look forward to working with you again in the near future.

Sincerely,

Michael J. Runnebohm, Secretary/Treasurer
